

Sebastian Lib

Front-end Developer

I am a self-taught frontend developer who has recently completed technical school. Every day, I am developing my skills by learning new technologies and consolidating already acquired knowledge. Right now, I am looking for an internship or full-time job. Location is not an obstacle because I am willing to relocate.

My Projects

CalendarCollaborate

React, Tailwind, Next, Typescript, MongoDB, Prisma

This project is a full-stack application where users can assign tasks for themselves or teammates if they have already created a team or joined an existing one. After creating a task, every eligible person can see it in the calendar. The application also allows users to follow other people, and users can also assign tasks to those they are following.

Shop-nextjs

React, Tailwind, Next, Typescript, MongoDB, Prisma, Stripe

In this full-stack application, you can create your own products, filter items by various categories, add them to your shopping cart, and buy them by stripe if you are logged in. You can also see your purchased products in the 'Purchased Items' section.

Portfolio Website

React, Tailwind, Next, Typescript, Aceternity UI, EmailJS

On this website, I showcase my best projects and demonstrate all my acquired skills. In the hero section, you can download my CV by clicking the button, and through the contact form, you can easily send me an email.

Work Experience

Internship - apollo.pl

2022 March - 2022 April

During my internship at Apollo, I gained hands-on experience in troubleshooting hardware and software issues for clients. I actively participated in diagnosing technical problems, providing solutions, and assisting in computer repairs.

I hereby consent to the processing of my personal data for the purpose of conducting recruitment for the position I am applying for, as well as for future recruitment purposes.
